

Adya Clarity REPORT

This report is made to assist those in the therapeutic community that are more familiar with the terminology used in the Classic Traditional medical practices. These include Ayurvedic, Tibetan, and Chinese medicine as well as Anthroposophical medicine. Those familiar with these terminologies will find in them a correspondence to the Allopathic evaluations listed below.

In our opinion, *Ayurvedic* terminology has the most precise way of describing the energetics of the Adya Clarity Waters (the Classical Medical Elements listed below are common to all disciplines).

According to the manufacturers, the active ingredient in the Adya Clarity Water system is Themarox, a priority formula compounded originally from Black Mica (Biotite Mica). In Ayurvedic medicine, Black Mica is called *Abhraka*. The only form used for therapeutic purposes is called *Vajra Abhraka*. The therapeutic form of Biotite Mica is determined by subjecting the mica to heat- the form of Biotite Mica that does not evince any form of change when subjected to heat is the only form selected. In Ayurvedic medicine, *Vajra Abhraka* is used in substance form after being purified through a complex process using various herbs and heat to make the substance non-toxic and metabolically available to the organism (*bhasma*). This is traditional in Ayurvedic medicine and not meant to indicate the process used by Adya Clarity Water systems.

Properties of *Vajra Abhraka*:

Taste/Rasa- Sweet (Earth + Water): promotes tissue metabolism; vitalizes; aperient and diuretic action.

Potency- Cold

Quality/Guna- Unctuous/*snigdha*: moisture; lubrication; vigour; compassion; love.

Promotes- complexion, strength, eye sight, intellect, lactation, longevity, power of digestion and metabolism.

Ayurvedic Indications;

Chronic bronchitis; asthma; anemia; tuberculosis; chronic fever; colic; gastritis; urticaria; vertigo; adenitis; and edema. It is also widely used as a rejuvenator.

In terms of the *Tri Doshas*, the general effect of Adya Clarity Waters is as follows (this is taken from both subjective reports and confirmed by the analysis recorded below):

Vata= Ether + Air Elements. *Pitta*= Fire and Water Elements. *Kapha*= Water + Earth Elements.

Tri Dosha physiology: *Vata* controls neural components; *Pitta* controls metabolic processes; *Kapha* controls Cell and Tissue properties.

Adya Water- raises *Vata*; raises *Pitta*; slightly raises *Kapha*.

Special Water- raises *Vata*; slightly raises *Pitta*; slightly raises *Kapha*.

Evaluations:

The following evaluations of *Adya Clarity Water* and *Special Water* were done using a MK12P/MA Analytical Computer by Copen Laboratories. We have found after extensive use of the device, that evaluations have a margin of error less than 5%. (By comparison allopathic Radiological imaging can have a margin of error up to a 25%).

NOTE: The following is an analysis of the relative *dynamic energy potentials* occurring within the *frequent oscillation* of the parameters specified below. The measurements start at a neutral base line of "0". The *dynamic energy* amplitudes run from 0-8 in increasing values when exposed to **Adya Clarity Water (AW)** and **Special Water (SW)**. These items were chosen only as indicators of basic mind/body functions- the list is far from exhaustive.

Allopathic:

Human Interferon-	AW 3	SW 8
Ectoderm-	AW 2	SW 2
Endoderm-	AW 7	SW 5
Mesoderm-	AW 7	SW 3
Pituitary gl.-	AW 7	SW 5
Pineal gl.-	AW 5	SW 6
Hypothalamus-	AW 6	SW 5
Thalamus-	AW 7	SW 6
Thymus gl.-	AW 4	SW 5
Thyroid gl.-	AW 4	SW 6
Ovaries-	AW 3	SW 6
Testes-	AW 5	SW 5
Frontal Lobe Cerebral Cortex-	AW 6	SW 2
Cerebral Cortex-	AW 2	SW 1
Mesencephalon-	AW 7	SW 4
Corpus Callosum-	AW 7	SW 3
Uncinate gyrus-	AW 7	SW 5
Cerebellum-	AW 7	SW 6
Medulla oblongata-	AW 3	SW 5
Autonomic Nerve System-	AW 6	SW 5
Myelin Sheaths-	AW 6	SW 6
Mitochondria-	AW 4	SW 8

Classical Medical Elements:

Ether/Wood-	AW 2	SW 6
Air/Metal-	AW 4	SW 1
Fire-	AW 7	SW 3
Water-	AW 0	SW 1
Earth-	AW 2	SW 2

Chakras:

Crown-	AW 0	SW 3
Brow-	AW 0	SW 2

Throat-	AW minus 2	SW 1
Heart-	AW 1	SW 3
Solar Plexus-	AW 7	SW 2
Sacral-	AW 7	SW 2
Base-	AW 8	SW 5

Subtle Bodies:

Etheric Body-	AW 1	SW 1
Astral Body-	AW 5	SW 3
Mental Body-	AW 5	SW 2

Evaluation Notes:

Our initial impression is that the generally higher amplitude (as evident in the above evaluations) of *Adya Clarity Water* over *Special Water* is due to the additive Themarox being more highly diluted when used as prescribed in the *Adya Mineral Water Filter System*. This would be consistent with the homeopathic principle that the higher the dilution the more energetically “potent” the medium. A higher potency will tend to effect functional levels more than tissue levels, (which is the domain of lower potency media).

This might indicate why the *Special Water* could be of use in cases involving physiological pathologies. Another indication of this is seen in the amplitude of *Adya Clarity Water* and *Special Water* where *Special Water* is high on Human Interferon (see above), which is a prime mediator of basal immunity directly effecting cellular and tissue immunity, and the mitochondria which regulate cell metabolism. Conversely, *Adya Clarity Water* for example, is high in stimulating the three lower Chakras and Nerve systems (see above) which relate to the stabilization of general bodily functions.

Note: Special Water = Super Shots= 5cc’s or 1tsp. Per two ounces of water
