

Once upon a time Dr. Shimanishi, the discoverer of what we today call Roxtract Solution in America was viewing a picturesque landscape on an island off the coast of Japan. A shapely pine tree was sitting on top of a boulder against the background of the gorgeous Pacific blue. A question occurred in his mind. "How does the tree sustain its life sitting on a boulder?" "Where do its nutrients come from?"

Nutrients from rocks, perhaps? That was his guess, but how? His conclusion was that those hair- like roots (like our capillaries) had a natural ability to extract minerals from the boulder and the rest was up to the rain and the sun for its health. His eventual conclusion was that answers to everything in our life could be and should be found in Nature.

After decades of research that had sent him to many continents of the world, in search of the best rocks that contained most abundant minerals, he found them. In his own backyard! The rest is history and thanks to his work, we have become the beneficiaries of his discovery. He invented a patented way to extract minerals from those rocks called black mica and maintain them in an ionized form. Eventually he became the authority on the treatment and cleaning of water in Japan. This extraordinary discovery has led not only to the betterment of human health, but to revolutions in such industries as agriculture, poultry, horticulture, aquatics, raw sewage treatment, and waste water treatment. As a result, major conglomerates now use his lab as the final resource for their respective water treatment. You've heard of Sony, Toyota, Hitachi, Matsushita , many other big companies known throughout the world. . . ; they are his major clients today.

So what have we found his minerals in an ionized form do?

- Orange County of California discovered that they could treat their raw sewage with this solution.
- In poultry industry, they discovered that egg yolks were bigger and the shells harder.
- In agriculture, Korea learned that rice stalks did not easily bend under the power of a Typhoon. This is a tremendous implication for the industry.
- In the dairy industry, cow manures are considered hardest to break down because of their high alkalinity. Roxtract Solution can render it a complete biodegradability.
- In Japan, aquatic industry already uses Roxtract (under a different name) to raise fishes, including their favorite Unagi, eels.
- Using Roxtract, we can make water to be surgically clean.
- In horticulture, Roxtract has been used as powerful nutrients in growing flowers. People who sell cut flowers have benefited greatly in prolonging the life of cut flowers.
- In fruit industry, Roxtract is used to deliver healthy dosage of abundant minerals to their fruits so that consumers can benefit from them.

- Medical researches have learned that the power of Roxtract has resulted in many new discoveries. Extraordinary findings will be announced in the future newsletters.

In the Roxtract Water System;

- We have discovered that these minerals in an ionized form can help hydrate our body much faster than regular water. With our Roxtract Water System, we can deliver 'living water' to everybody who invests in this non electric, gravity fed device.
- There are 22 lab proven minerals in an ionized form. We believe there are over 40 trace minerals in the Roxtract Solution.
- We have a scientific document that proves that the cluster of water molecule will be reduced to 6.5 from 12, which is the size of other kinds of water we label as "dead water." Reverse osmosis water, distilled water, tap water, purified water are all dead water. Other than hydration, they do little in terms of delivering benefits to our health.
- Roxtract minerals have the ability to decalcify. Therefore any calcification build-up that takes place within our body will be dissolved. Think of the implication from the dental issues to kidney stones.
- Roxtract minerals seem to teach our body how to go fishing. (We don't give you fish; but minerals do the teaching to your body.)
- Minerals in an ionized form do a fast garbage collection work. That means toxins within our body will be fast ushered out thru urine, sweat and other transportation methods. (Aren't the toxins reasons for illnesses?)
- Roxtract Minerals draw purest oxygen from the water they are in, sending fresh dosage of oxygen to your body, every time you drink this water. This means that Roxtract water can be stored for eternity, as long as you keep it in the dark. If left for the direct or indirect exposure to the sun, the water develops algae within. Don't worry. This is 'healthy' algae', but you may not like the green stuff you see in the water.

What are some of the things we hear from people

- My skin from the 2nd day on feels like 'silk'.
- My nails are more pliable than before,
- I don't lose hair any more.
- I don't bloat any more
- My surgeon said that I'd require 6 months for a complete recovery. I recovered in two months.
- I lost weight.
- I don't have to sleep as much as I used to. (One person said he now sleeps only 4 hrs. a night.)
- The pain I have sustained from arthritis disappeared within a week after "I started this water."
- The acute pain I had from a kidney stone disappeared within days.

- My bowel has changed to soft one like baby's, including the color (yellow).
- I have so much energy now.
- It tastes so good that I find myself drawn to the Roxtract water constantly.
- I don't get a hunger pain. Sometimes I can go a whole day without eating food, as long as I am drinking this water.
- My concentration has become sharper and more focused.
- I feel I have a complete control over health, energy and thought.
- My blood pressure dropped within a week.
- My blood sugar count dropped. My doctor asks what I have been doing.
- This water seems to teach me what's good to drink and what's bad to eat. How? I get a severe stomach ache if I drink beer or whisky and this lasts a whole day sometimes.
- My kids suddenly began drinking this water and now stay away from nationally famous soft drinks. (Sorry, we can't name them. But you know them.)
- The taste of my coffee with this water is unbelievable.
- My tea tastes so- - - sweet now.
- My coffee tastes fabulous.
- My rice tastes much better.

Our conclusive impression is that given proper nutrition, our body seems to know what to do with them. And we are definitely implying health. This is why our motto is "We sell health. Interested?"

Everybody has a right do die healthy.
